

Vatsal Soni

Senior Full Stack Developer · React · Node.js · AWS · TypeScript

Mumbai, India • [+91 98192 12790](tel:+919819212790) • sonivatsal3@gmail.com • vatsalsoni.in • linkedin.com/in/vatssoni

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 4+ years of experience architecting and delivering end-to-end web applications across media, fintech, and e-commerce. Deep expertise in React.js, Next.js, Node.js, and AWS cloud infrastructure, with a proven track record of shipping NDA-bound, compliance-grade systems at Jio Creative Labs — a Tier 1 brand. Known for rare frontend depth — advanced GSAP animations, 3D integrations, and performance-optimised interfaces — combined with robust backend API design, data encryption, and hands-on cloud deployment. Consistently trusted with direct client communication, cross-functional stakeholder coordination, and full product ownership.

PROFESSIONAL EXPERIENCE

Full Stack Developer

Jio Creative Labs | Jun 2024 – Present *Mumbai · Contract*

- Architected and shipped 2 NDA-bound full stack applications end-to-end, partnering closely with UI/UX and Art teams to deliver immersive, responsive, and visually rich digital experiences on schedule.
- Engineered AES-encrypted data pipelines with automated purging mechanisms, achieving full compliance with organisational data-retention, privacy, and regulatory standards across multiple governance frameworks.
- Owned cloud infrastructure lifecycle on AWS and GCP — provisioning EC2, RDS, S3, Route 53, and Elastic IP — maintaining 99%+ production uptime and coordinating with Security, Compliance, Architecture, and Network Ops teams.
- Built jiocreativelabs.com: a visually immersive public-facing site featuring advanced GSAP scroll animations and integrated 3D elements, demonstrating rare frontend animation craft at production scale.

Full Stack Developer

Finnowski | Jan 2024 – Jun 2024 *Mumbai · Contract*

- Delivered a fully featured vendor dashboard for a government-linked e-commerce enablement platform, enabling sellers to manage product catalogues, track orders in real time, and handle core operations end-to-end.
- Owned solo full stack delivery — Next.js and MUI on the frontend; Node.js, Express.js, REST API, and MySQL on the backend — shipping the complete platform within a focused 6-month contract under strict NDA.

Full Stack Developer

3 Minds Digital | Nov 2022 – Dec 2023 *Mumbai*

- Delivered 5+ full stack web and mobile applications from greenfield using React.js, Node.js, MongoDB, and MySQL — each shipped on deadline via close client collaboration and structured weekly feedback loops.
- Spearheaded AWS cloud deployments (EC2, S3, Route 53, RDS) across multiple production environments, establishing repeatable infrastructure patterns that reduced setup time for each successive project.
- Designed and implemented RESTful APIs using Node.js, Express.js, Sequelize ORM, and Mongoose; actively participated in code reviews, debugging sessions, and architectural planning discussions.
- Maintained direct client communication channels throughout project lifecycles — gathering requirements, presenting progress, and translating business needs into technical specifications.

Web Developer

Aurus IT Solutions | Jul 2022 – Oct 2022 *Mumbai*

- Developed interactive HTML/CSS/JavaScript prototypes for client presentations and integrated third-party APIs to extend platform functionality and improve user engagement metrics.

MERN Stack Developer

Contriver Tech | Jun 2021 – Jun 2022 *Mumbai*

- Independently built full stack MERN applications (React.js, Node.js, Express.js, MongoDB), developing strong product ownership instincts alongside collaborative cross-functional working practices.

KEY PROJECTS

Jio Creative Labs — jiocreativelabs.com

- Immersive full stack marketing site for a Tier 1 media brand featuring advanced GSAP animations, integrated 3D elements, and a dynamic CMS-backed content layer — demonstrating production-grade frontend animation depth.

Federal App — Full Stack Semi-E-Commerce Platform

- End-to-end platform with Admin and Wholesaler Dashboards, real-time order tracking (Pusher), product management, and notification systems. Built with TypeScript, React.js, Node.js, and MySQL. Sole owner of deployment and client relationship.

Worldnest — Unlisted Shares Transaction Platform (Fintech)

- Led frontend architecture and co-designed scalable backend APIs for a fintech platform handling unlisted share transactions — prioritising transaction security, regulatory compliance, and seamless user experience.

TotalEnergies India & ELF India — Enterprise AMC Maintenance

- Independently managed and maintained two enterprise-grade websites (Drupal CMS) on a retainer basis, collaborating directly with client stakeholders to implement updates and resolve technical issues in a timely manner.

TECHNICAL SKILLS

- Frontend:** React.js, Next.js, TypeScript, GSAP, Redux Toolkit, Redux Toolkit Query, MUI, Bootstrap, Sass/SCSS, YUP
- Backend:** Node.js, Express.js, GraphQL, REST API, MySQL, MongoDB, Sequelize ORM, Mongoose, JWT, Bcrypt, Pusher, Multer, Joi, Strapi CMS
- Cloud & DevOps:** AWS (EC2, S3, Route 53, RDS, IAM, Elastic IP), GCP, Azure, PM2, CertBot, Google reCAPTCHA
- Security & Other:** AES Data Encryption, Compliance Systems, Automated Data Purging, Drupal CMS, Cross-functional Stakeholder Management

EDUCATION

Master of Computer Applications (MCA)

TIMSCDR, Mumbai University | Jan 2021 – Jul 2022 *CGPA: 8.7 / 10*

Bachelor of Science — Information Technology (BSc IT)

UPGASC | Aug 2017 – Oct 2020 *CGPA: 7.46 / 10*
